**Subject:** TRIM: Synergen Position on Generator Financial Reporting (SEM-11-106)

Fergus

Synergen supports the submission made by the NEAI on Generator Financial Reporting (SEM-11-106), and concurs with the views set out in relation to:

- whether the information required at a generating site level of granularity is necessary to meet regulatory objectives;
- the legality of publishing commercially sensitive information; and
- the potential detrimental impact of publishing such information on promoting competition and protecting end customers.

Kind regards

**DEIRDRE O'HARA**
