**Re: Consultation Paper on the Implementation of Regulation 2019/943 in relation to Dispatch and Redispatch**

Dear Gina and Gary,

ENERCON welcomes the opportunity to engage with the SEM Committee and respond to the consultation paper on the 'Implementation of Regulation 2019/943 in relation to Dispatch and Redispatch'.

ENERCON is a leading wind turbine manufacturer who employs 186 persons in Ireland and has the highest market share on the island of Ireland consisting of 653 wind turbines in 140 wind farms, which gives a total installed capacity of 1.3 GW.

ENERCON fully supports the Irish Wind Energy Association (IWEA) and Northern Ireland Renewable Industries Group (NIRIG) response to the consultation and would like to highlight the correct implementation of these Articles will play a large role in the timely delivery of 70% renewable electricity in Ireland and in meeting Northern Ireland's future renewable energy targets.

We support the positions taken by IWEA and NIRIG and wish to reiterate that the points raised in their consultation response are extremely important to ensure reduced investment risk in Ireland and Northern Ireland and will lead to the most cost-effective method of meeting 2030 renewable energy targets.

In conclusion, we would like to thank the SEM Committee for the opportunity to engage on this matter and look forward to continuing our work with you in future.

Yours sincerely

ENERCON GmbH Irish Branch
